for owners and would be owners of four wheeled four cylinder engined morgan's. Ken Hill has created an invaluable bible which is absolutely packed with genuinely useful information. Ken sets the stage by detailing the history of the Morgan Motor Company, describes the marque's motorsport record and then in great detail chronicles the evolution of each four cylinder model. Next comes a huge amount of practical advice on maintenance, repair and modification of these cars, advice based on information gathered over a number of years from a host of Morgan owners and specialists around the world. This book's guidance on restoration techniques will prove to be a real boon to those undertaking a rebuild or considering the purchase of a car in need of restoration. Again, this advice is based upon experience as Ken restored his own concours winning Morgan. Part of the Morgan experience is the social scene that embraces the marque on a worldwide basis, so Ken devotes a whole chapter to Morgan clubs and their activities. The last part of the book is a series of appendices comprised of technical data sheets, wiring diagrams, lubrication charts, Lucas electrical equipment data sheets, details of specialists, distributors and manufacturers, and details of Morgan miniature models. Altogether, this work is a unique source book of essential information for all Morgan owners and enthusiasts.

Without question, the 1964 1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique, behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang, with stinging losses from the Edsel Ford fresh in mind. At Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a Herculean task to convince Henry Ford II to take a risk on a new concept of automobile. But with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's. If it failed, the process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail during the process. Many fascinating

experimental cars such as the mustang i two seater mustang ii prototype mustang allegro and shorty were built but eventually the mustang based on the existing ford falcon received the nod for final production in a gala event it was unveiled at the 1964 world s fair in new york the mustang received public accolades and critical acclaim and soon it became a runaway hit after the initial success ford designers and gale halderman designed and developed the first fastback mustangs to compliment the coupes the classic mustang muscle cars to follow including the gt mach 1 and others are profiled as well the mustang changed automotive history and ushered in the pony car era as a nimble powerful and elegantly styled sports coupe but it could so easily have stumbled and wound up on the scrap pile of failed new projects this is the remarkable and dramatic story of how the mustang came to life the demanding design and development process and ultimately the triumph of the iconic american car
